# Sharp Introduces PN-E Series Displays, Delivering Essential Performance for Education, Corporate, and Digital Signage Applications

High-resolution performance, flexible installation, and plug-and-play simplicity for today's fast-moving industries

**TORONTO, ON – September 4th, 2025 – Sharp Electronics of Canada Ltd.** proudly announces the launch of its latest innovation in commercial display technology — the PN-E Series, designed to meet the evolving demands of businesses, educators, and industry leaders across the country.

From dynamic corporate boardrooms to high-impact retail environments, the PN-E Series offers a versatile lineup of seven screen sizes — 32", 43", 50", 55", 65", 75" and 86" — delivering brilliant UHD 3840x2160 resolution (Full HD for 32"), 350 nits' brightness, and anti-glare high haze panels for crisp, clear visuals.

Built for seamless integration and maximum adaptability, the PN-E Series supports landscape, portrait, and tilt installations, features multiple input options including dual HDMI 2.0, USB-C, and an integrated media player, and operates reliably 16 hours a day, 7 days a week. Its robust metal bezel design and three-year limited commercial warranty make it a dependable choice for both small-scale deployments and enterprise-wide rollouts.

Across industries, the PN-E Series' technical advancements enable more impactful, tailored experiences. In corporate settings, crisp UHD visuals and wide connectivity options enhance presentations and hybrid collaboration. In retail, vivid, glare-resistant imagery ensures promotions stand out, even in brightly lit environments. In education, reliable 16/7 operation and multiple mounting options allow for always-visible learning tools. For hospitality, the robust design, consistent brightness, and easy integration support real-time information delivery that keeps audiences informed and engaged.

"The PN-E Series is designed for today's evolving communication needs, combining exceptional clarity, adaptability, and effortless integration," said **David Oyagi, Category Business Manager, Visual Solutions Group, Sharp Electronics of Canada**. "Whether

enhancing customer engagement, driving workplace collaboration, or supporting modern education, the PN-E Series brings performance and versatility together in a single solution.”

With support for both Sharp and NEC legacy control protocols, the PN-E Series ensures scalability for existing infrastructures while giving system integrators the flexibility to innovate. These displays are purpose-built for a wide range of sectors, including corporate, retail, education, transportation, and hospitality — wherever visual communication needs to inform, engage, and inspire.
