SHARP Introduces Cutting-Edge All-In-One Direct View LED Series, Featuring Seamless Integration and Superior Imaging

SHARP's newest innovation offers seamless integration, user-friendly functionality and impactful imaging

MISSISSAUGA, ON, May 5th – SHARP Electronics of Canada Ltd. is proud to announce the launch of its new All-In-One Direct View LED (dvLED) displays, further expanding SHARP's professional display portfolio in Canada. The LD-AF Series, available in two generous sizes (138" and 165" diagonal), offers a brilliant and seamless viewing experience that is both easy to install and simple to operate – ideal for corporate boardrooms, educational environments, and collaboration spaces.

These all-in-one dvLED solutions combine Japanese engineering heritage with modern design innovation, delivering a true plug-and-play experience that drastically reduces installation time – requiring as little as two hours and no special training. By integrating advanced display technologies into a single unit, SHARP is making high-end dvLED more accessible to Canadian organizations looking for performance and elegance without complexity.

The LD-AF Series is designed with ease of use at the forefront, featuring the same intuitive user interface and control protocol found in SHARP's commercial [PN-ME2 Series](#). Equipped with built-in Wi-Fi, large-capacity speakers, and multiple connectivity options including HDMI x3 and USB-C, the displays also support wireless screen sharing and embedded media player functionality. Integration with NaViSet Administrator2™, Crestron Connected®, and EShare ensures these displays can be deployed seamlessly into modern AV and IT environments.

“At Sharp Canada, we are committed to delivering technology that reflects the precision, reliability, quality, and sustainability of our engineering legacy,” said **Rolland Manger, Senior Director, Marketing and Business Planning, SHARP Canada**. “With the LD-AF Series, we’re offering our customers a sleek, all-in-one dvLED solution that simplifies installation and operation, while maintaining the superior visual quality and innovation that professionals have come to expect from SHARP.”

The LD-AF Series will be available for purchase in Canada starting May 2025, demonstrating SHARP's focus on quality, reliability and sustainability to allow for the best user experience. To learn more about these new displays, please visit sharp.ca.

About SHARP Electronics of Canada Ltd.

SHARP Electronics of Canada Ltd., a subsidiary of SHARP Electronics Corporation, is a leading provider of business solutions and consumer electronics. Our consumer products include state-of-the-art home appliances such as microwaves, refrigerators, and air purifiers, designed to elevate daily living. For businesses, we offer advanced office solutions including multifunction printers, professional displays, and interactive touchscreens that enhance productivity and collaboration.
